

A matter of inspiration

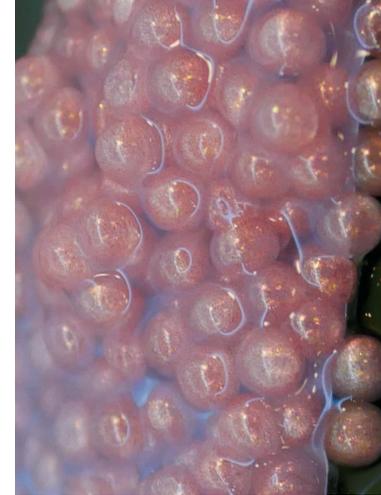

matériO'

A worldwide materials and technologies watch dedicated to innovation

20 years ago, the matériO team gave itself the mission to constantly be on the cutting edge concerning emerging materials and technologies. Through several types of services, it provides numerous companies willing to innovate with a unique and sharp technology watch to nourish their need for inspiration.

matériO is a private company, independent of the manufacturers indexed in its database. This service is indeed only financed by its users.

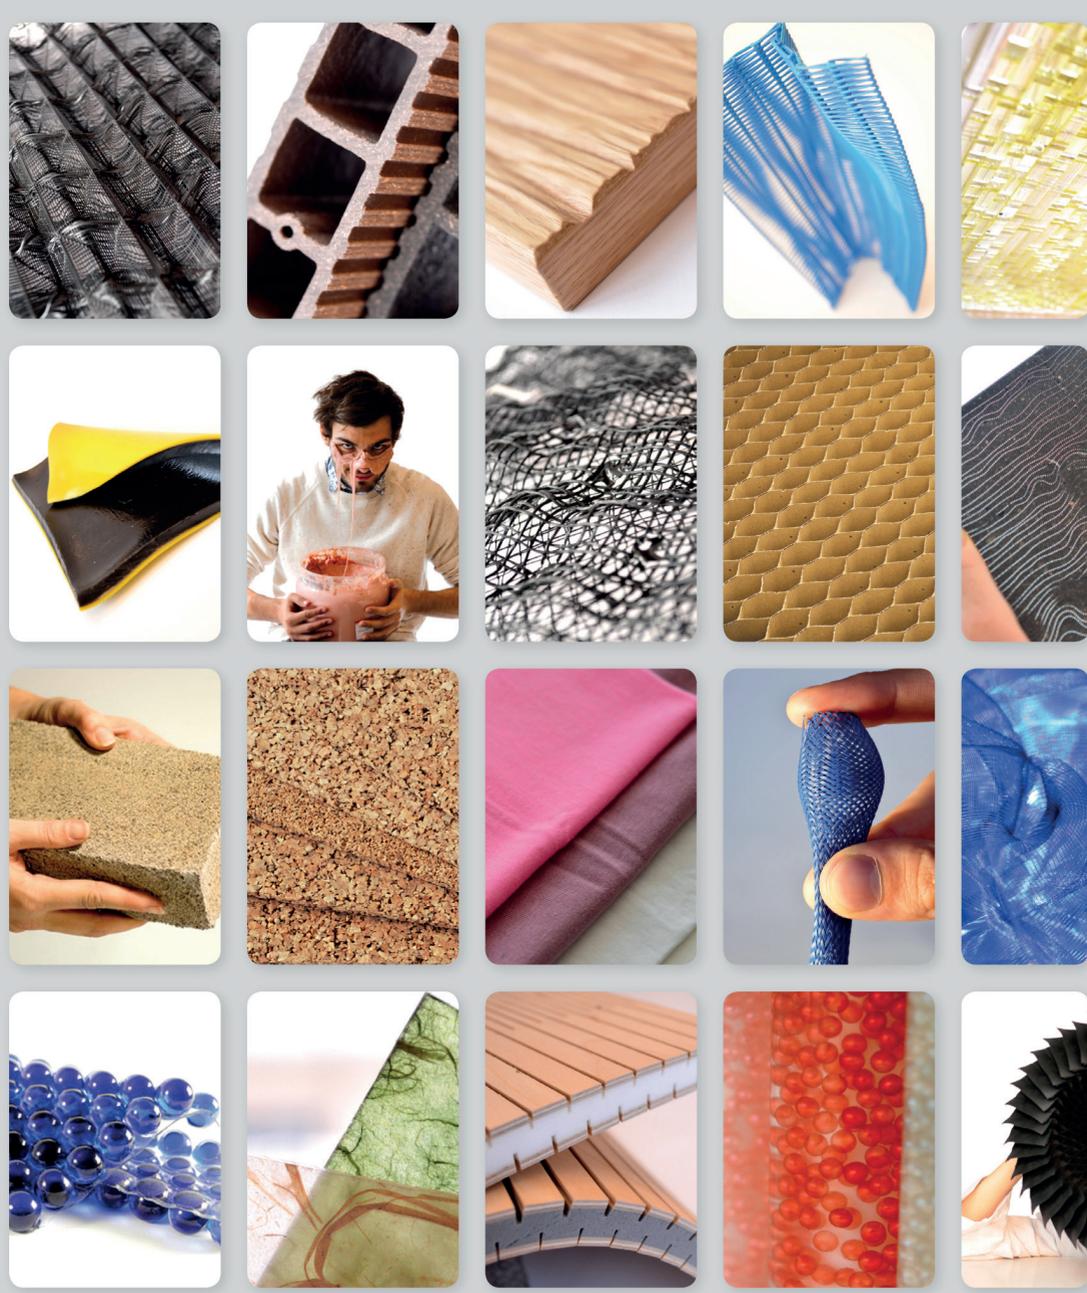

4 showrooms

Paris, Praha, Seoul, Geneva.

Come see and touch: in each showroom, thousands of singular material, product and technology samples are accessible, classified by families. Sparkling places, where creative professionals can come to manipulate and to get inspired !

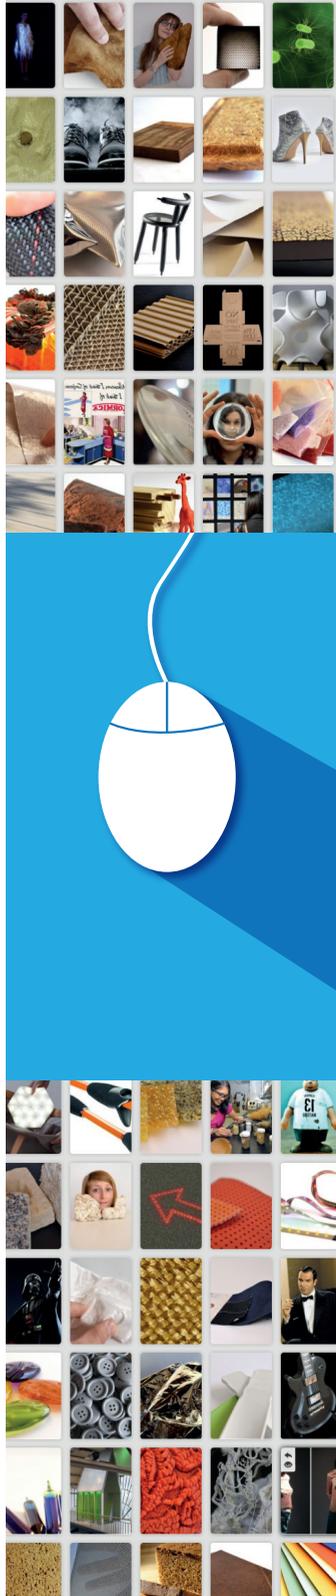

The online database

www.materio.com

Launch researches: the virtual material library houses the entire set of references our team carefully selected (over 6 000 manufacturers contact details and more than 10 000 intriguing materials). This online tool offers extensive answers to member's queries, thanks to surprisingly intuitive, user-friendly and original research functions. A must-have tool !

Both physical and online databases are updated on a daily basis and grow through the addition of the latest novelties on an international scale.

matériO' it's also...

Events

Exhibitions (curation and design), lectures, seminars, materials spaces during fairs... Everything is possible !

Books

matériO is also author of several books, published by Frame Publishers.

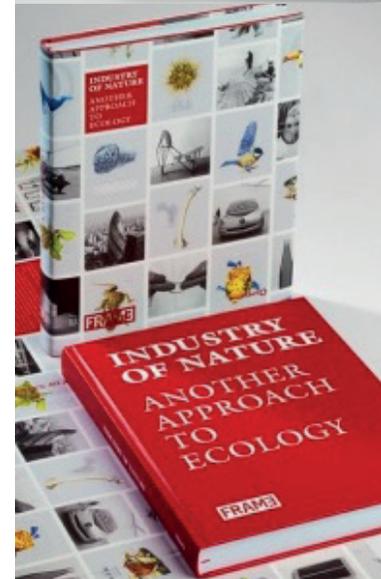

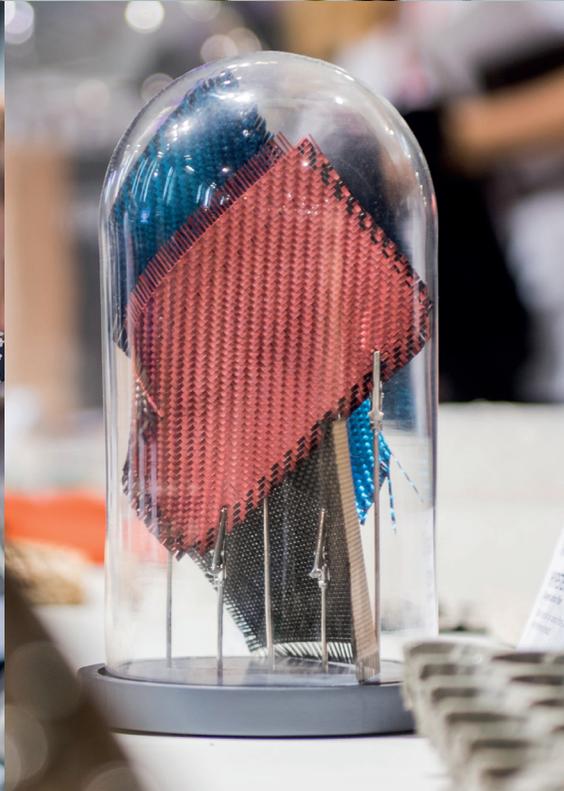

MATERIOLOGY, The Creative Industry's Guide to Materials and Technologies

matériO' Team

matériO' is above all a team of search heads who put all their senses on alert everyday to track down technologies and singular materials all over the world, shaking up manufacturers to get samples or additional information, working without respite to facilitate new uses for these thousands of singular materials !

This is the same team that feeds the database every day, writing with love and precision material IDcards that can be understood by everyone in order to provide creators with a work tool that allows them to be as autonomous as possible in their research.

And it's still this team that independently holds and organizes the material library, to provide creative professionals with the richest, most inspiring, open and intuitive material library possible!

Great clients...

As the key word is decompartmentalization of industrial fields, many international companies with very varied business cores do use our service.
